

# MOONPOT

## WHITEPAPER

Version 1.94

# Our Mission

**We want you to win huge jackpots of your favorite cryptos, starting with Dogecoin.**

**We also want to solve one of the biggest problems in DeFi... buying Pressure! The way this is done is by implementing a mechanism with certain buy requirements.**

**Jackpots will be awarded in Dogecoin right now, but additional cryptocurrencies may be added later with community votes.**

# How Moonpot Works

5% of every buy/sell goes into the prize pool!  
(The 5% fee applies to both buys and sells).

## Two ways to win:

1. Every time the prize pool reaches \$2000, the contract randomly awards it to 2 winners! 75% goes to someone who purchased while that jackpot was building, and 25% goes to a random holder (who has at least 0.1 BNB worth of Moonpot). The more 0.1 BNB buys you make, the higher your chances of winning!

2. If nobody purchases at least 0.1 BNB worth of Moonpot for 10 minutes, the Jackpot goes to the last person who made a 0.1 BNB buy.

**Note:** The prize pool is only referring to the amount that is paid out. The contract itself actually must build up double that amount before being triggered. It randomly awards 50% of total (100% of prize pool) to the 2 winners and the other 50% goes to the Treasury.

# What can I win?

Jackpots are automatically paid out to your wallet in BEP-based tokens every time you win!

Just make sure to add the following tokens to your wallet in order to see your prizes when they arrive:

- BEP Dogecoin
- BEP Ethereum
- BEP Bitcoin
- BEP Solana
- BNB

# Tokenomics

**There is a buy and sell  
fee of 5% for Moonpot:**

**-5% Jackpot**

# Token Supply

There will be a 100 million supply of Moonpot tokens.

There is ZERO Private sale Tokens, ZERO Presale Tokens, and ZERO team tokens!

**ANY AND ALL TOKENS WILL BE BOUGHT AT CURRENT MARKET VALUE!!!**
